

## EtherDelta Management System

# EtherDelta

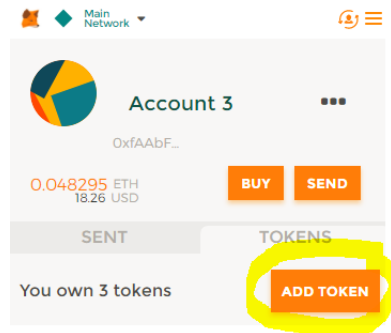

Installation and Operation Manual

Version 1.00

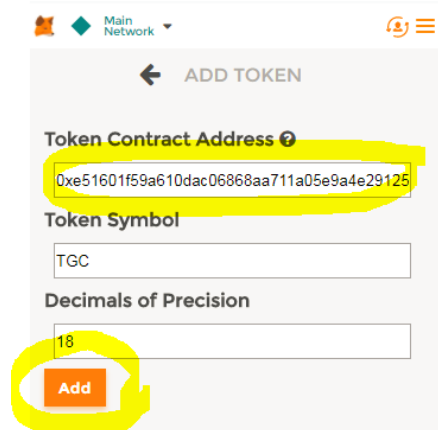

## How to trade in EtherDelta using MetaMask - TrueGoldCoin - ver 1.00

1. Install MetaMask and add TGC
  - 1.1. Open Chrome.
  - 1.2. Install MetaMask. Go to <https://metamask.io> and click "Get Chrome Plugin."
  - 1.3. Write down the recovery phrase MetaMask gives you and store it somewhere safe and secure. Do **not** skip this step.
  - 1.4. Import your account (holder of TGC tokens) to MetaMask
  - 1.5. Add TGC token to MetaMask
    - 1.5.1. Press in ADD TOKEN

- 1.5.2 Put ERC20 TGC Contract Address and press Add:

TGC Contract Address: [0xe51601f59a610dac06868aa711a05e9a4e291256](https://etherscan.io/address/0xe51601f59a610dac06868aa711a05e9a4e291256)

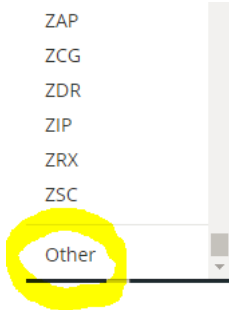

2. How to use in EtherDelta
  - 2.1. Make sure you are logged into MetaMask
  - 2.2. Go to EtherDelta: <https://etherdelta.github.io/>
  - 2.3. Your MetaMask account address should appear automatically in the EtherDelta account dropdown (upper right). If it doesn't, something has gone wrong. If you have another Ethereum plugin running (Parity), go to Window -> Extensions and disable it.
  - 2.4. Select your MetaMask account from the account dropdown (upper right)
  - 2.5. Add TGC token to EtherDelta

### 2.5.1. Dropdown (upper left) token list

### 2.5.2. Go at the end of the list and select "Other"

#### 2.5.2.1. In "Other token" windows, put TGC token contract address (0xe51601f59a610dac06868aa711a05e9a4e291256), Name (TGC) and press "Go"

Other token

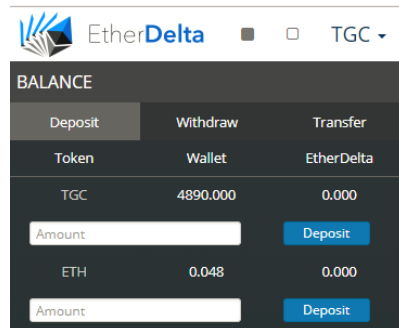

Address  
0x

Name  
XYZ

Decimals  
18

Cancel Go
